SAMSUNG KIOSK POWERED BY GRUBBRR

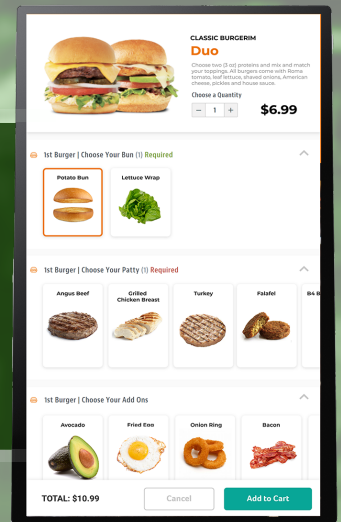

CLOVER EDITION

Small Business Kiosk Platform

Right now, restaurant operators are struggling to combat inflation, the labor shortage, and rising consumer demand for omnichannel dining.

To adapt, GRUBBRR and Samsung have developed a fully integrated, turn-key solution designed to help restaurant operators run their business more efficiently with fewer employees.

The Samsung Kiosk Powered By GRUBBRR Clover Edition uses smart upsell technology to increase average ticket size and drive incremental revenue. By automating front-of-house tasks, restaurants can reallocate labor to more value-add positions, thereby decreasing operating costs, increasing average ticket size, improving the customer experience, and streamlining operations.

Automated Menu Import & Sync

Enable Self-Ordering

Upsell Feature Increases Avg. Ticket Size

Reduce Labor Cost of Cashier

Improve Customer Experience

FDA Approved Antibacterial Screen

Available on the Clover App Store
